

This bar chart examines the relationship between the number of images and median shares for technology-related articles.

Key Findings:

- Articles with 4–7 images had the highest median shares (2,000).
- Articles with no images or 1–3 images had the same median shares (1,600).
- Articles with 8 or more images had a median of 1,800 shares.

Conclusion:

Articles with 4-7 images appear to perform better in terms of median shares.
